

ATTENTION

ACTIVE RADON TEST IN PROGRESS

Closed building conditions need to be maintained 12 hours before and during the 48 hour test. Please take note of the following requirements:

- Keep windows and doors closed other than momentary use.
- Avoid excessive operation of exhaust systems such as clothes dryers, bathroom exhaust fans and kitchen range hoods.
- Do not operate evaporative coolers or other ventilation systems that bring in outside air.
- Do not utilize wood or gas burning fireplaces unless it is the only source of heat.
- Furnaces and refrigerated air systems may operate as usual but be sure to maintain an indoor temperature range of 65F to 80F.
- Do not disturb the testing devices.

THANK YOU!
